# Report on the Administration of the Karauli State for the year 1905-06.

Covering a period from the 1st April 1905 to the  
31st October 1906.

---

## CHAPTER I.

### GENERAL AND POLITICAL.

*The State covers an area of 1,242 square miles ; the population, according to the Census of 1901, numbers 1,56,786 ; the gross revenue (based on an average of past five years) of the State is Rs. 5,50,000 ; the State pays no tribute to Government or to any State.*

The present Chief, His Highness Maharajah Dhiraj Sir Bhanwar Pal Deo Bahadur Yadukul Chandra Bhal, G.C.I.E., was born on the 24th February 1864, and succeeded to the Gaddi on the 14th August 1886, by adoption. H. H. the Maharajah has married six wives, of whom four are living, but has no issue nor has he adopted any son. He is recognized as the head of the Jadon Rajputs, and is a lineal descendant of the Shri Krishna, the mythical god of Brij (Muttra).

2. The most notable event of the year was the Famine which resulted from the failure of Kharif harvest of 1905, and which proved extremely disastrous. The Hon'ble the Agent to the Governor-General, Rajputana, visited Bharatpur early in September 1905, and held a conference with a view to effective measures being adopted to meet the situation in Karauli.

Mr. H. C. Clogstoun, Officiating Political Agent, Eastern Rajputana States, visited the State on the 21st September 1905, and advised the Durbar as to the measures to be adopted to improve the financial condition of the State.

Early in November 1905, Mr. Judd, State Engineer, Bharatpur, was deputed to Karauli to start certain relief works in the State.

The Durbar are extremely thankful to the Government of India for their great liberality in placing temporarily, free of charge, the services of Captain A. B. Drummond, I.A., as Political Officer of the State. He arrived in Karauli on the 20th November 1905, and ably conducted the famine relief operations to the close.

The services of Mr. A. W. Dady, Assistant Engineer, Burma, were temporarily placed at the disposal of the State. He was appointed State Engineer on a salary of Rs. 600 per mensem, and was allowed necessary

Notabl  
events

establishment with a view to carry on the relief works under the general supervision of the Political Officer.

In December 1905, Mr. H. R. C. Dobbs, C.S.I., I.C.S., Famine Commissioner, Rajputana, and Major L. Impey, I.A., his successor, paid a visit to Karauli with a view to advise the Durbar in connection with the famine operations, and inspected certain localities affected by famine.

In the same month, Mr. F. St. G. Manners-Smith, Superintending Engineer, also visited the State, inspected certain Irrigation Projects, and advised the Durbar as to the best project to be undertaken.

The Hon'ble Mr. E. G. Colvin, C.S.I., I.C.S., Agent to the Governor-General for Rajputana, visited Karauli on the 4th February 1906, discussed several matters of importance, and gave valuable advice to the Durbar in matters financial, as well as those relating to relief operations in the State.

Colonel Sir Swinton Jacob, Consulting Engineer, came to Karauli on the 13th February 1906, and inspected the Nidar Tank Project.

Major Drake-Brockman paid two visits to Karauli, first on the 27th February 1906, for his annual inspection, when he also inspected the District Dispensaries of Sapotra and Machilpur, and secondly on the 25th July 1906, when cholera had broken out in the city in epidemic form.

Major L. Impey, I.A., Political Agent, Eastern Rajputana States, visited Karauli on the 24th April 1906 for a week, and inspected certain Relief operations, the Poor-house and Irrigation Works in progress in the District. He discussed several matters of importance and gave valuable advice in the matter of improving the embarrassed condition of the State.

3. Colonel C. G. F. Fagan, I. A., held charge of the office of the Political Agent, Eastern Rajputana States, from April to the middle of August 1905, when he was succeeded by Mr. H. C. Clogstoun, C.I.E., who remained in temporary charge of the Political Agency till end of October 1905. Colonel R. H. Jennings, R. E., C. S. I., Resident, was then appointed in charge of the Agency and was succeeded by Colonel J. R. C. Colvin, I.A., on the 19th February 1906. On the latter proceeding on furlough, Major L. Impey, I.A., assumed charge of the Political Agency on the 17th April 1906.

Dewan Bahadur Munshi Balmukand Das, C.I.E., Rao Bahadur, on furlough, was deputed to proceed to Karauli to take charge of the finances of the State for a period not exceeding six months. He arrived on the 12th April and assumed charge of his office as Revenue and Financial Member of Council on the 14th April 1906. At the instance of His Highness the Maharajah, the term of his office has since been extended to a further period of three years.

Kanwar Dhian Pal Singh, B.A., Chief Member of Council, tendered his resignation and left Karauli on the 15th April 1906.

Changes  
in the person-  
nel of the  
administra-  
tion.

4. The State Council was reconstituted in April 1906, and is composed of the following two members :—

Constitu-  
tion of  
Council.

(1) Revenue and Financial Member, Dewan Bahadur Munshi Balmukand Das, C.I.E., Rao Bahadur.

(2) Home Member, Rao Saheb Babu Bholanath Chatterji.

Appendix No. I gives the names of High Officials in the State.

## CHAPTER II.

### ADMINISTRATION OF THE LAND.

5. For purposes of Revenue Administration, the State is divided into five Tahsils, viz. :—

Revenue  
Administra-  
tion.

- (1) Hazur Tahsil.
- (2) Machilpur „
- (3) Mandrail „
- (4) Utgir „
- (5) Jirota „ (since transferred to Sapotra).

There has never been a regular Revenue Settlement in the State. In 1882 a Summary Settlement was made for four years and the Jama was fixed at Rs. 2,69,313 per annum. Fresh Summary Settlements were again undertaken with the following results :—

In 1886 A. D.	...	...	Rs. 2,85,214 per annum.
„ 1899 A. D.	...	...	„ 3,13,273 „

N.B.—Jagirs worth Rs. 29,355 were, shortly after this assessment, granted by the State.

In 1903 A. D.	...	...	Rs. 2,87,441 per annum.
---------------	-----	-----	-------------------------

The assessments made from time to time were generally heavy and not evenly distributed, and the ryots could not pay the demands easily. The result was that large outstanding balances accrued, and that a number of villages were either partially or wholly depopulated.

In 1896 A.D., an attempt was made to make a plane table Survey. Boundary and Field maps were accordingly prepared. Field Maps (Shajras) were not, however, compared with Field Registers (Khasras), and the village areas were not totalled and checked. The entries, as regards proprietary and tenancy holdings, are entirely unreliable and incomplete, and the Survey records have not been attested. It is under contemplation to carry out a regular Revenue Settlement of the State as early as practicable.

The Tahsil and Patwari Establishments are far too inadequate and low paid, and, therefore, inefficient; and steps are being taken to revise and strengthen them at an early date.

Owing to the distress and famine which prevailed during the greater portion of the period under report, and the consequent emigration and loss of agriculturists and their cattle, no waste land was brought under cultivation; on the other hand, a large area of cultivated land remained waste.

Appendix XX gives the agricultural stock in the State.

Boundary.

6. No cases of Boundary disputes were either pending or settled during the period under report.

Taccavi.

7. Liberal Taccavi advances, to the extent of Rs. 47,266 as detailed below, were made to the agriculturists :—

1.	For purchase of bullocks	...	...	Rs.	1,800
2.	„ Seed grain	...	...	„	43,827
3.	„ Wells	...	...	„	1,639
Total					<u>47,266</u>

A further sum of Rs. 2,872 was expended by the State on the improvement of wells, not as Taccavi, but on the consideration of realizing increased profits on the land thus improved.

The practice hitherto obtaining in the State was to sink or deepen wells when absolutely necessary on its own account after extracting a promise from the agriculturists, whose land was to be improved, to pay a profit at the rate of Rs. 25 per cent. on the outlay, whether the wells thus sunk or deepened gave a sufficient supply of water or not. This has proved ruinous to the agriculturists. The practice has now been entirely put a stop to and the agriculturists are being induced to obtain Taccavi advances which will be granted freely. The rate of interest on Taccavi advances was Rs. 24 per cent. per annum, it has now been reduced to Rs. 12 per cent. per annum, and a further reduction in the rate of interest is under contemplation.

At the instance of Captain A. B. Drummond, I.A., a grant of Rs. 30,000 was generously made from the Indian Famine Trust Fund for distribution to impoverished cultivators to enable them to purchase cattle and seed grain, and it is satisfactory to note that 1,025 plough bullocks have been purchased by means thereof.

Collections.

8. The total collections on account of Land Revenue during the period under report amounted to Rs 2,01,021 as detailed below :—

During the year ending 30th April 1906	...	Rs.	91,210
„ half-year „ 31st October 1906	...	„	1,09,811
Total			<u>2,01,021</u>

The total amount budgetted for on account of the Land Revenue during the year ended 30th April 1906 was Rs. 3,23,069. Owing, however, to the prevalence of famine, a sum of Rs. 91,210, or nearly  $4\frac{1}{2}$  annas in the rupee was collected, and the balance of Rs. 2,31,859, or  $11\frac{1}{2}$  annas in the rupee had to be suspended.

## 9. The outstanding arrears of Land Revenue to end of Sambat

Arrears.

				Rs.	a.	p.	1961 (1904-05) amounted to
1.	Hazur	Tahsil	...	19,473	10	9	Rs. 1,33,357 as detailed in the
2.	Jirota	"	...	1,478	8	6	margin. To this may be added
3.	Machilpur	"	...	20,747	12	6	a sum of Rs. 2,32,548 sus-
4.	Mandrail	"	...	49,193	13	3	pended during the period under
5.	Utgir	"	...	42,463	8	3	
Total				1,33,357	5	3	

report, making a total of Rs. 3,65,905.

It will be impossible to recover the whole of this amount from the cultivators, a greater portion of which will have to be remitted as soon as the regular Revenue Settlement operations, which will shortly be undertaken, are completed, and easy instalments will be determined for the recovery of the balance.

## CHAPTER III.

## PROTECTION.

10. In 1881-82, a simple Code of Criminal and Revenue laws, based on these in force in Jhallawar, was introduced. The Criminal and Civil laws are adopted from the British Codes, but virtually the spirit and principles of the laws in force in British India are followed and acted upon in the Judicial Courts. Besides the codified law of revenue in the State, various circulars and standing orders are, from time to time, passed by the State Council to meet local exigencies.

Legislation.

Appendix II gives the detail of the laws in force in this State.

11. The State Forces are divided into Regular and Irregular Infantry, Cavalry and Artillery.

Military.

Owing to the embarrassed condition of the State finances, large reductions had to be carried out in May last, and the strength of the Force was fixed as under, with the following results :—

STRENGTH AND COST BEFORE REORGANIZATION.			STRENGTH AND COST AFTER REORGANIZATION.		REDUCTION IN No. AND SAVINGS IN EXPENDITURE EFFECTED.	
Description.	No.	Cost.	No.	Cost.	No.	Cost.
		Rs.		Rs.		Rs.
1. Regulars—						
(a) Cavalry, 2 Regiments ...	157	24,318	126	19,071	31	5,247
(b) Infantry with Band.	346	17,092	260	13,252	86	3,840
(c) Field Artillery ...	32	1,647	25	1,293	7	354
Total ...	535	43,057	411	33,616	124	9,441
2. Irregulars, including Fort Garrison ...	1,433	87,213	828	51,293	605	35,920
GRAND TOTAL ...	1,968	1,30,270	1,239	84,909	729	45,361

It will be seen that the total reduction in the Army, both Regulars and Irregulars, came to 729 men, thereby causing an annual saving of a little over Rs. 45,000. Of the men reduced, 115 men, at an annual cost of Rs. 5,500, were transferred to the Police to increase the efficiency of that Force. The net savings, therefore, amounted to close upon Rs. 39,500.

It was apprehended that the large reductions proposed in the Army might possibly lead to active disturbance. With a view, therefore, to allay the feelings of discontent and obviating hardship, and possibly active disturbance, the following points were kept in view at the time of carrying out general reductions :—

- (a) A maximum total of each regiment or Bera was determined with due regard to the efficiency of the service.
- (b) All men whose age exceeded 55 years, or of more than 25 years' service, were allowed adequate pension for their subsistence.
- (c) Arrangement was made to allot land not exceeding five bighas to such of the Rajput servants who desired it either in lieu of pension, or in case of being discharged without pension, not as a free grant but for cultivation, on payment of half the usual rent for a period not exceeding five years. The land would at the expiry of the period be assessed according to revenue rates unless, of course, His Highness might wish to exact service from the holders of such land, in which case some concession might be allowed at the time of the Revenue Settlement.
- (d) Minors already appointed in the Force, and who had substitutes working for them, were allowed Re. 1 per mensem till such time only as they reached the age of 18 years; the substitutes being discharged at once.
- (e) Men between the ages of 50 and 55 years were retained in addition to the total fixed to complete their period of service, and to be retired at the age of 55 years on pension.
- (f) Rajputs, if otherwise fit, were not discharged as far as possible, but retained in their posts in preference to others.

It is gratifying to note that the above considerations served, to a great extent, to allay the feelings of discontent, and that no great hardship was actually felt. As vacancies occurred, the discharged men were given preference over new men and appointed to the vacant posts, and thus there are now very few men left who have not, one way or the other, been provided with means of subsistence. The remaining few men will also, in a very short period, be suitably provided for.

Arms.

12. The Infantry is armed with muskets and bayonets, and the Cavalry with swords and muskets. They are stationed at the capital and are employed to keep watch and ward. The Dils are stationed at the

several forts and castles in the State, to keep peace and order in the country.

Appendix No. III shows the strength, cost and other particulars of the Military Force in the State.

13. The Judicial officer has the charge of the Police Administration of the State. The cost charged to the Police before the reorganization was Rs. 6,800 a year. This did not, however, represent the total expenditure incurred under this head, as the Army supplied 272 men to guard the various road-side outposts, and to perform Police duties in many other ways. It was, however, noticed that the men who received their pay from the Army did not discharge the duties imposed on them by the Police efficiently. With a view to ensure efficiency, it was thought expedient to transfer 115 young and strong men, fit for Police duty, from the Army to the Police, and add four officers and two clerks to the existing Police Force.

Police.

The following statement gives the actual number of men, with cost in the Police Force before the reorganization, both from the department itself and the Army, as compared with the present sanctioned scale with cost :—

BEFORE THE REORGANIZATION.				AFTER THE REORGANIZATION.				
Designation.	Num-ber.	Amount.		Designation.	Num-ber.	Monthly Pay.	Annual Cost.	
		Rs.				Rs. a. p.	Rs.	
1. Officers ... ..	10	2,487		1. Inspector of Police ...	1	25 0 0	300	
				2. Sub-Inspectors ...	3	45 0 0	540	
2. Clerks ... ..	7	864		3. City Kotwal ...	1	35 0 0	420	
				4. Thanedars ..	7	140 0 0	1,680	
3. { Police Sepoys 85. Tahsil " 5. Dils from Military } ...	362	17,110		5. Police Line Officer ...	1	15 0 0	180	
				6. Clerks ... ..	9	85 0 0	1,020	
4. Contingencies ... ..	...	174		7. Jamadar ..	1	5 0 0	60	
				8. Constables, City Police ...	25	100 0 0	1,200	
				9. " for Thanas ...	70	280 0 0	3,360	
				10. " " Inspectors and Sub-Inspectors	20	80 0 0	960	
				11. " " Police Chauki...	78	312 0 0	3,744	
				12. Menials ... ..	..	14 0 0	168	
				13. Contingencies ... ..	...	30 10 8	368	
Total ... ..	379	20,635		Total ... ..	216	1,166 10 8	14,000	

By the reorganization the number of worthless men has been much reduced while, on the other hand the efficiency of the service has considerably been improved. Arrangement has also been made to supply the Force with uniform, and a sum, not exceeding Rs. 1,000, will be expended annually from the savings of the Police allotment, for providing the men with uniform of approved pattern.

The Police Constables are generally equipped with *lathis*, but they usually keep their own swords and guns.

The ratio of the Police to population is 1 to 72·4, and that to area 1 to 5·75 square miles.

Appendices Nos. V, VI and VII show the working of the Police.

Village  
Chowkidars.

14. There is no regular Village Police. In most of the big villages, the Balais, who are usually of Chamar caste, serve as Chowkidars. They are further bound to report the occurrence of any crime, the prevalence of an epidemic disease, and other important matters to the Thana, or the nearest Chowki. They receive no fixed pay, but have free holdings or receive certain perquisites from the village, in lieu of which they perform such duties.

Finger  
Impressions.

15. The finger impressions of eighty-three criminals undergoing sentences for specified offences were taken for the purpose of identification, and supplied to the Central Bureau at Mount Abu, during the period under report.

Courts of  
Justice.

16. The Judicial machinery of the State consists of—

- (1) Five Tahsildars who exercise the powers of a Magistrate of the 3rd Class in Criminal cases, and are empowered to decide Civil Suits of the value of Rs. 50 and under.
- (2) The Court of the Judicial officer exercising the powers of a District Magistrate, as also those of a District Judge. It hears appeals from the orders of the Tahsildars, and is authorised to hear Civil Suits of any value.
- (3) The Judicial Member of Council has power to hear Civil and Criminal Appeals from the orders of the Judicial officer in the manner described below:—

(a) *Civil Appeals*.—All appeals of money suits, the value of which does not exceed Rs. 500, subject, of course, to appeal to His Highness the Maharajah in full Council; but those of value exceeding that amount are brought up before the full Council for decision.

All appeals of suits involving landed property, or any interest in land, or of suits in which the question of right or custom is involved, are decided in full Council.

(b) *Criminal Appeals*.—All Criminal Appeals in which the sentence of an imprisonment for two years or under, and of fine up to Rs. 200 is passed, are subject to appeal to His Highness the Maharajah in full Council; but all cases in which the sentence exceeds that limit, as also all Sessions cases, are heard and disposed of by the full Council.

The decision of the full Council, in all cases, is subject to the confirmation of His Highness the Maharajah.

His Highness the Maharajah has power of life and death.

17. It is satisfactory to note that, on the whole, offences against the human body showed a slight falling off during the year ended on 31st March 1906, as compared with the previous year, the numbers being 285 and 298 respectively; while the offences against property rose from 228 to 344, the prevailing drought being responsible for the increase, particularly of thefts and highway robberies, which rose from 97 to 218 and from 2 to 8 respectively. The number of dacoities was 2, against nil in the year before.

Criminal  
Justice.

During the half-year ending the 31st October 1906, the number of offences tried was as follows :—

1. Offences against human body.—						
Culpable homicide	...	...	...	...	2	
Attempt to murder	...	...	...	...	1	
Suicide	...	...	...	...	12	
Grievous hurt	...	...	...	...	12	
Simple	..	...	...	...	82	
					—	109
2. Offences against property.—						
Theft	...	...	...	...	144	
Highway robbery	...	...	...	...	5	
Dacoity	...	...	...	...	1	
					—	150
3. Other offences	...	...	...	...	...	294
					TOTAL	553

Eight hundred and forty-one offences were committed during the year ended 31st March 1906, which, with 13 cases pending disposal at the close of the last year, gave a total of 854 cases for disposal, against 752 of the year before. Eight hundred and thirty-three cases against 739 of the last year were disposed of during the year, leaving 21 cases pending at the close of the year. This balance, together with 553 cases instituted during the half-year ending 31st October 1906, made up a total of 574; of these, 560 were disposed of, leaving a balance of 14 at the close of the period under report.

Eight hundred and twenty-five persons were arrested during the year ended on 31st March 1906, out of whom 475 were convicted and 339 were acquitted or discharged, leaving 11 awaiting trial at the close of the year. Five hundred and nine persons were arrested during the half-year ending 31st October 1906, of whom 305 were convicted, 191 were acquitted or discharged, 3 were surrendered to other States and 2 were confined in the Lunatic Asylum, leaving 19 awaiting trial at the close of the period under report.

The following is the distribution of convictions according to the nature of the punishment awarded :—

KIND OF PUNISHMENTS.	NUMBER OF PERSONS.	
	During the year 1905-06.	During the half year ended 31st Octo- ber 1906.
(a) Simple Imprisonment	...	4
Rigorous	...	133
Imprisonment with fine	...	21
" for life	...	1
	<hr/>	<hr/>
Total	...	159
(b) Fine only	...	283
Stripes	...	33
	<hr/>	<hr/>
Total	...	316
	<hr/>	<hr/>
GRAND TOTAL	...	475
	<hr/>	<hr/>

The sentences under (a) in the last paragraph, classified according to terms of imprisonment, are as below :—

	During the year 1905-06.	During the half year ending 31st Octo- ber 1906.
Under 1 month	21	13
From 1 to 2 months	52	28
" 2 " 3 "	7	8
" 3 " 6 "	22	33
" 6 " 12 "	31	11
" 1 " 2 years	13	10
" 2 " 3 "	9	2
" 3 " 5 "	3	...
Over 5 years	...	...
Life imprisonment	1	...
Capital punishment	...	...
	<hr/>	<hr/>
Total	159	105
	<hr/>	<hr/>

Details of the criminal work disposed of by the Judicial Court are given in Appendix VIII.

Appendix No. IX shows the result of appeals disposed of during the period under report.

#### Civil Work.

18. The number of Civil Suits instituted during the period under report in the several Courts was 241, while that remaining from last year was 2, making a total of 243; of these 222 were disposed of, leaving 21 pending at the close of the period. Of the 222 disposed of, 202 related to money and 20 to immoveable property.

The total value of suits filed amounted to Rs. 21,925-8-6, and that of disposal to Rs. 18,557-9-3.

The year began with six applications for execution of decrees, and 200 were filed during the period, making a total of 206 cases; of these, 193 cases were disposed of, leaving 13 cases pending at the close of the period.

The value of cases filed, including that of cases remaining from the previous year, was Rs. 26,311-0-6; while the value of cases disposed of amounted to Rs. 23,607-1-6.

Appendices Nos. X, XI, and XII show the working of the Civil Courts.

19. There has been no change as regards the extradition rules Extradition. between this and the adjoining States.

Sixty offenders were demanded by this State, of whom 25 were surrendered during the period under report as detailed below:—

From Jaipur	...	...	...	13
„ Bharatpur	...	...	...	7
„ Dholpur	...	...	...	5
			<hr/>	
			Total ...	25
				<hr/>

Out of the 102 criminals demanded by other States, 54 only were extradited, as per detail given below:—

20. There is only one Jail at Karauli, situated in the City. Prison. The buildings are open and healthy, and sufficient for present requirements; there is a small factory and a Litho Press in the Jail.

The number of prisoners, at the commencement of the period under report, was 35, and 399 were admitted. Of the total 434, 333 were released after the completion of their respective terms of imprisonment, leaving 101 at the close of the period.

The health of the prisoners throughout the period is reported to have been generally satisfactory, with the exception of a few occasional season ailments like malarious fever, &c.

With a few exceptions, the conduct of the prisoners generally remained satisfactory.

The total expenditure incurred in connection with the up-keep of the Jail and the maintenance of prisoners, including press and factory, aggregated to Rs. 8,137-3-9.

Appendix No. XIII shows the number of persons confined in the Jail.

Registration.

21. The following documents were registered :—

(1) Mortgage-deeds	...	...	17
(2) Sale-deeds	...	...	54
			<hr/>
Total	...	...	<u>71</u>

The value of documents registered amounted to Rs. 18,309-8, and of Registration fees to Rs. 697-8.

The Judicial Officer is the Registrar, and the Tehsildars are Sub-Registrars, the latter being empowered to register documents up to the value of Rs 50 only.

Appendices XIV and XV show the registration of documents, receipts and expenditure, on account of registration, during the period under report.

Municipa-  
lity.

22. There is only one Municipality at the capital, which continued to work satisfactorily during the period of report.

The Municipal Board consists of 1 President, 1 Vice-President and 12 members with a Secretary. The leading citizens who form the Bench of Magistrates work by rotation, and dispose of cases reported against breaches of Municipal Bye-laws.

The principal streets and lanes being paved with the beautiful red stone of the country, and the city being situated on a steep hill, the natural drainage is excellent.

Sweepers, with a small supervising staff, are engaged for sanitation and proper cleaning.

The principal source of income is the Octroi tax on grain.

The total income from all sources, including last year's balance, amounted to Rs. 14,710-8-3, while the expenditure was Rs. 12,556-0-6.

Appendix No. XVI shows the receipts and expenditure of the Municipality.

## CHAPTER IV.

### PRODUCTION AND DISTRIBUTION.

Season and  
Crop.

23. The average rainfall of the State for the year ended the 31st March 1906 was 7 inches 67 cents., against 32.52 of the previous year, showing a deficiency of 24 inches and 85 cents.

The serious failure of the monsoon caused practically a total loss of Kharif harvest, on which the people of this State largely depend. Of the five tehsils in the State, the harvest may be said to have totally failed in all except Jirota, where the rainfall was favourably distributed, and that received in September saved the situation there.

The failure of the Kharif crop, coupled with the damage from frost to the preceding Rabi harvest, was the chief cause of famine, which proved so very disastrous. The entire failure of the fodder and grass intensified

distress from the commencement, and was keenly felt among the pastoral population of the Dang or uplands, as the flocks and herds of these people form their chief means of subsistence. They emigrated in large numbers together with their cattle, towards Malwa, but unfortunately could only save a few. It is estimated that 20 per cent. of the normal population left the State, which represents 30,000 souls. The loss amongst cattle was very heavy, and is estimated to be a little over two-thirds of the normal number. There was no rain in the winter with the exception of a few showers in February and March 1906.

Contrary to expectation, however, a very much better Rabi crop was realised. The wells held out satisfactorily and a large area of land in river-beds and on the banks of the Chambal and Banas was brought under cultivation. This tended to materially lessen the distress in April 1906, and thereafter, more especially in the low lands of Mandrail and Utgir tehsils. The average outturn of the whole year was about four and a-half annas in the rupee.

Unfortunately the monsoon of 1906 cannot be said to be favourable. It gave a meagre rain in June and July amounting, on an average, to 3 inches 90 cents, which, however, enabled the cultivators to till their soil and sow seed. A prolonged break from 1st August till the 2nd September, with the exception of scattered local showers in parts, gave cause for great anxiety, and the crop was being slowly ruined, when good rain in September, all over the State, completely saved the situation, and the crops revived in the most wonderful manner, and an almost normal Kharif harvest was reaped. Locusts appeared in large numbers in August and did some little damage in parts of the State, but with the good rainfall of early September they moved off and the crops revived wonderfully.

24. The final report on the famine of 1905-06, in this State, drawn up by Captain A. B. Drummond, I.A., Political Officer, Karauli, gives a most comprehensive and detailed account of the famine. It will, therefore, suffice to give only some of the most important facts and figures in this report. Owing to the deficiency of the rainfall up to the end of August and the general failure of the Kharif harvest, it was obvious that a serious situation would be created. The Hon'ble the Agent to the Governor-General for Rajputana visited Bharatpur in September 1905, and held a conference to consider what measures should be adopted to meet the situation in Karauli. Kunwar Dhian Pal Singh, the then chief member, attended on behalf of the Karauli Durbar, and a memorandum was drawn up embodying the decisions arrived at. It was estimated that over sixteen thousand units would require relief on works daily, and that the cost of combating the famine would amount to about Rs. 5,00,000. With the State Treasury empty, it was necessary to have recourse to a loan. On the recommendation of the Hon'ble the Agent to the Governor-General, the Government of India shortly afterwards agreed to advance a sum of Rs. 1,00,000 as a preliminary measure with the object of making a commencement. Mr. Judd, the State Engineer of Bharatpur, paid a visit to Karauli early in November to start relief

Famine.

measures in Karauli. During the short period of three days he opened two works under the Modified Contract System, consisting of a tank work at Khubnagar and improvements to the road leading to Kaila. Two of the subordinates who were brought by Mr. Judd to Karauli were placed in charge of works, and two were deputed on Survey duty. Captain A. B. Drummond, I.A., was, in the meanwhile, appointed Political Officer and arrived here on the 20th November 1905. Mr. Dady, an Assistant Engineer from Burma, was appointed State Engineer on 5th December, and the necessary Subordinates and Public Works Department Establishment were soon secured. Rao Saheb Babu Bholanath Chatterji was selected and appointed Central Famine Officer, and Hafiz Asghar Ali to assist the Central Famine Officer for general touring and inspection work. Poor-houses were opened at the capital in Machilpur and Mandrail, and arrangements were made for the distribution of doles of cooked food to *purda nashin* women and other respectable persons in need of assistance in the above three towns. The measures of relief carried out during the famine consisted of :—

- (1) Departmental Relief Works, Major and Minor.
- (2) Village Works.
- (3) Gratuitous Relief in Poor-houses and by Doles.

The general organisation, supervision and control of all measures of famine relief rested with the Political Officer deputed to Karauli in charge of Famine Relief operations. The two principal officials working under him were the State Engineer and the Central Famine Officer. A committee was formed for the purpose of collecting and distributing funds for charitable purposes. A grant of Rs. 30,000 was generously made from the Indian Famine Trust Fund for distribution to impoverished cultivators to enable them to purchase cattle and seed grain. Two thousand four hundred and eleven cultivators received assistance in this way, and they expressed gratitude for the money so distributed. The total amount of loan received from the Government of India for famine purposes was Rs. 2,50,000 : of this, a sum of Rs. 2,33,585-14-7 was expended on Famine Works and the balance was transferred to the State for completion of the Madanpur tank, which was started during the famine. The public health during the famine period, both in the city of Karauli and in the district, remained, on the whole, uniformly good, until cholera broke out at the very end on July the 26th. The total number of seizures in Karauli city amounted to 484, and the total number of deaths 298. Remedial measures were adopted, including liberal applications of permanganate of potash, to all sources of drinking water supply.

The following is a list of some of the important works undertaken during famine :—

#### A.—HAZUR TEHSIL.

- (1) *Kaila Road*.—This road is fifteen miles and two furlongs from Karauli city to the Kaila Devi Shrine, where two large fairs are held annually.
- (2) *Hindaun Road*.—This road is the only means of communication between Karauli city and the Railway, and in

consequence there is a very heavy traffic along the road. The length of the road within the Karauli State is about nine miles. It has been re-sectioned and has received a renewal coat of kankar consolidation three inches thick. All causeways and culverts have been repaired, and the earth side berms have been widened and greatly improved.

- (3) *Vicinity Roads*.—Total length nearly five and-a-half miles, has been re-sectioned and has received a renewal coat of kankar three inches thick.
- (4) *Bund at Rudor*.—This bund dams up a deep and narrow nalla to prevent its increasing and washing away the fields about Rudor.
- (5) *Salempur Bund*.—This work consisted in earth work repairs, and was carried out on the Modified Contract System.

#### B.—MACHILPUR TEHSIL.

- (6) *Madanpur Tank*.—This is the construction of a large and useful tank at Madanpur. The available storage of supply of water is estimated at 49 million cubic feet and is capable of irrigating 490 acres of land.

The anticipated yearly return on the cost of the work is estimated at Rs. 2,160, or  $6\frac{1}{2}$  per cent. on estimated cost.

- (7) *Chamraola Tank*.—This work consisted of repairing an old tank above Madanpur which had fallen into disuse for want of repairs. The earthwork was renewed and a pucca masonry sluice and a masonry weir were provided.

#### C.—MANDRAIL TEHSIL.

- (8) *Rajghat Road*.—This is a new cart road constructed between Mandrail and the Chambal river in order to form a through cart communication with Sabalgarh in the Gwalior State, a route through which a considerable quantity of trade traffic passes.
- (9) *Rampura Tank*.—The repairs executed to this tank consisted of renewing the earthen dam to its original section and reconstructing the masonry weir.
- (10) *Mandrail Tank*.—This is a small bund newly made of earth work with masonry weir at one end.
- (11) *Koka Tal*.—A small new tank made of earth and provided with a masonry weir and sluice.

#### D.—UTGIR TEHSIL.

- (12) *New tank at Kaserh*.—The bund is of earth with stone pitching on its minor slope. The work could not be completed during the famine period.

The total number of units relieved under all heads on departmental and village works was 15,26,854, as detailed below :—

1. Relief works	...	...	...	...	14,01,925
2. Gratuitous Relief	...	...	...	...	1,24,929
Total	...	...	...	...	<u>15,26,854</u>

Ninety-two thousand five hundred and eighty-nine units were relieved in Poor-houses :—

					<i>Units.</i>
Men	...	...	...	...	28,606
Women	...	...	...	...	28,498
Children	...	...	...	...	35,485
Total	...	...	...	...	<u>92,589</u>

The number of *pardah nashin* women and infirm persons relieved by means of doles was 32,340 :—

Men	...	...	...	...	436
Women	...	...	...	...	27,051
Children	...	...	...	...	4,853
Total	...	...	...	...	<u>32,340</u>

The total cost of Relief Works with dependants amounted to Rs. 1,38,997-8-2 as below :—

						Rs.	A.	P.
1. Village works	...	...	...	...	...	20,532	10	6
2. Public Works Department works	...	...	...	...	...	1,18,464	13	8
Total	...	...	...	...	...	<u>1,38,997</u>	<u>8</u>	<u>2</u>

The subjoined table gives details of the total expenditure incurred on Famine Relief in the Karauli State during 1905-06, amounting to Rs. 2,33,585-14-7.

[TABLE.]

Wages  
and Labour.

25. With the exception of the famine period, when labourers were paid at famine wages, the ordinary wages remained steady; the local supply of labour was sufficient to meet local demand.

Prices of  
and Grain.

26. Appendix XVIII is annexed showing the prices of staple food grains, etc., for the period ending the 31st October 1907. A comparison of the figures given for these periods, viz., March 1905-06 and October 1906, clearly shows that the prices were almost normal in March 1905, that they rose considerably in March 1906, owing to the prevailing drought, and that they, with a few exceptions, fell again in October 1906, owing to good Kharif harvest.

Forests.

27. There is no trained officer in the Forest Department; it is, however, under contemplation to appoint one as soon as the services of a really good man can be secured on moderate pay.

The exact area of Forests is not known as they have never been surveyed; they may, however, be classed as:—

- (i) Preserved Forests, and
- (ii) Unpreserved Forests.

Soon after the rainy season sets in, the Preserved Forests are demarcated by flags; grazing therein is strictly prohibited and cases of trespass are severely dealt with. Grazing is freely allowed in Unpreserved Forests on payment of fees at fixed rates. There are no communications and buildings of any importance. Existing pathways, roads and buildings are kept in fairly good order. No regular account of timber and fuel felling has hitherto been maintained, but arrangements are being made to do so for the future; 18,000 maunds of fuel were cut and collected for State purposes and sale during the year ended the 30th April 1906, and 4,512 maunds during the half year ended the 31st October 1906. One thousand and seventy-two maunds of charcoal were burnt in various forests for sale and supply to various departments during the year ended the 30th April 1906, and 861 maunds during the half-year ended the 31st October 1906. The charcoal is usually burnt by *Kumhars* who supply it to the State at the rate of two and-a-half maunds to the rupee. Fodder grass grows in abundance in the Forests, but it is impossible to collect the whole quantity for the following reasons:—

- (1) The labour is scarce.
- (2) The country being very hilly and there being no cart roads to the grass-collecting stations, camels alone are generally employed in bringing it in.
- (3) The grass preserves are at a very great distance from the capital, and the cost of conveyance is, therefore, prohibitive.

The year ending the 30th April 1906, being a famine year, there was very little grass available in the Forests; in the previous year of the value of Rs. 1,150, 1,150 maunds of grass of the value of Rs. 1,150 were collected from the Forests at a cost of Rs. 7,950 and 13,672 maunds were in hand and 13,672 maunds of Rs. 7,950 or a total of 16,822

maunds of the value of Rs. 9,100; of this, 15,150 maunds were supplied to the State Departments, and the balance, 1,672 maunds, were sold to the public.

When the State supply had been exhausted, a further supply of grass and fodder was obtained from the Sirohi State and through contractors at a cost of Rs. 13,871-7-6 as detailed below :—

	Quantity.			Rate per maund.			Cost.		
	Mds.	Srs.	Ch.	Rs.	a.	p.	Rs.	a.	p.
1. Sirohi grass ...	2,283	36	14	2	6	6 $\frac{1}{4}$	5,498	9	0
2. Contractors' grass...	2,580	16	6	1	13	0 $\frac{3}{4}$	4,726	13	0
3. Pala and Toora ...	3,397	36	0	1	1	2	3,646	1	6
Total ...							13,871	7	6

Had the State managed to keep a reserve of grass in good years, it would have not only saved this large expenditure on the purchase of grass and fodder but have, on the other hand, sold the surplus at a great profit to the public, and saved the lives of several thousands of cattle in the State.

This question is engaging the serious attention of the Council, and steps are being taken to collect as much grass as possible in future years, and to keep a large reserve always in hand for such exigencies. Seventeen thousand eight hundred and seventy maunds of green grass of the value of Rs. 1,787, were supplied to the State animals during the half-year ending 31st October 1906.

All the State Forests are protected from fire. No area was burnt during the period under report.

The total receipts from all sources amounted to Rs. 7,024, as detailed below :—

	Rs.
During the year ended on the 30th April 1906 ...	3,990
„ half-year „ 31st October 1906 ...	3,034
Total ...	7,024

The expenditure was—

	Rs.
During the year ended on the 30th April 1906 ...	2,095
„ half-year „ 31st October 1906. ...	1,858
Total ..	3,953

showing a net saving to the Department of Rs. 3,071.

28. There is no very extensive branch of industry in the State, except agriculture; the chief produce of the country being Indian corn, bajra and juar; pulses mung, moth and urad, and rice. Cotton, zira and opium are also cultivated and exported.

Trade  
and Manufac-  
ture.

The remote and secluded situation of the State makes it unfavourable for commercial and industrial development of high order. It is, however, hoped that the opening up of the country by new roads, the

construction of the Nagda-Muttra Railway line in the neighbourhood, and the facilities afforded by the Telegraph and Post Offices, the commerce, on the whole, will show signs of increase in the near future. The chief manufactures of the country are—manufacture of gunny (tat), cloth dyeing, turning, lacquer work, hukka or kali bowls and stone work. Pewter and brass ornaments are also moulded in large quantities, which are chiefly used and worn by the poor and low caste women. The principal articles of export are cotton, opium, zira, ghee, rice, etc.; and those of import are sugar, indigo, tobacco and cloth.

Public  
Works.

29. The State Public Works Department was in charge of Thakur Debi Pal during the period. No works of any importance were undertaken. The usual construction of and repairs to Buildings and Roads were carried out at the following cost:—

During the year ended the 30th April 1906	...	Rs. 9,655
„ the half-year ended the 31st October 1906	„	4,755
TOTAL		<u>14,410</u>

After the close of famine works in August 1906, the services of Babu Burkatullah Khan, an Overseer employed on the Famine Works, were transferred to the State, and he was entrusted with the construction of and repairs to Irrigation Works and Roads. The Madaupur Tank, which was commenced during the famine, was continued to the close of the half-year ending the 31st October 1906, and repairs to certain Irrigation Works were carried out by him at the following cost:—

			Rs.
(a) Public Works Department Establishment	...	...	3,818
(b) Irrigation, Original Works	...	...	7,599
(c) Repairs	...	...	156
(d) Roads, Repairs	...	...	51
(e) Survey	...	...	60
Total		...	<u>11,684</u>

The total cost of the Public Works Department during the whole period came to Rs. 26,094.

Appendix XIX shows details of expenditure on Public Works Department.

Post  
Office.

30. There was formerly only one Imperial Post Office in the Karauli City, the combined Telegraph Office being added subsequently. On 1st January 1905, four branch Post Offices were experimentally opened in Machilpur, Mandrail, Sapotra and Kurgaoon. The first three having failed to prove self-supporting were closed one by one. The abolition of these Post Offices has caused great inconvenience to the State as well as to the Public, and the subject as to whether local Post Offices be opened, or the State guarantee to make up the deficiency occasioned to the Imperial Post, is under consideration.

Mint.

31. The State coin having much depreciated, the Karauli Durbar, with the sanction of the Government of India, decided to introduce

British currency in place of the State coin, and make the former coin the only legal tender throughout the State.

The exchange having been settled at the rate of 5 per cent., that is to say, the State accepting 100 British rupees for 105 genuine Karauli rupees, a total sum of Rs. 6,71,161-12-0 Karauli rupees was paid to the Mint Master, Bombay, in exchange for Rs. 6,39,078-9-3 British rupees received from the Government. With effect from 1st March 1906, the British rupee is a legal tender throughout the State territory, and the State mint is entirely closed except for Gold Mohurs, which do not constitute a coin of commerce and are not legal tender.

32. The abkari contract was leased for three years at Rs. 2,350 a year, and the contract for drugs at Rs. 1,350 a year. Both these contracts expire in May next, when it is hoped better terms will be secured.

Excise.

Appendix XXI shows the Excise Revenue of the State.

33. The income under this head during the year ending April 1906 was Rs. 53,811, against the Budget Estimate of Rs. 90,000, the famine being responsible for this decrease. During the half-year ending 31st October 1906, a sum of Rs. 46,000 was estimated for, but Rs. 26,249 only were actually realised. This large decrease is attributable to the following causes :—

Customs.

- (1) The trade was slack during the rainy season.
- (2) A considerable number of cows and she-buffaloes had died during the late famine, and consequently the production of ghee, which is largely exported, is much reduced.
- (3) The royalty on stone ballast, lime, etc., due by the Railway had not been recovered during the half-year.

The number of smuggling cases remaining from the last year was 27, and 622 cases were instituted during the period, making a total of 649 ; of these 592 were disposed of, leaving 57 pending at the close of the period under report.

With a view to exercise strict supervision and check over the receipts of this important source of revenue, the number of chowkies has been increased, the supervising staff has been strengthened, the tariff has been revised, new rules have been framed for the guidance of the staff and for punishment of the offenders, and the department has been taken under direct management of the Council.

## CHAPTER V.

### FINANCE AND REVENUE.

34. The Financial statements for the period under report are divided into two parts :—

Finance  
and  
Revenue.

- (1) From 1st June 1905 to 30th April 1906, *vide* Appendix XXII A. attached.

(2) From 1st May to 31st October 1906, *vide* Appendix XXII-B. attached,—and the results are focussed in the statements given below :—

From 1st June 1905 to 30th April 1906.

CLOSING BALANCE	...	...	...	65,880	+65,880

The most noticeable features of the Financial Administration of the period under report were :—

(a) The State Treasury was almost empty.

(b) The liabilities were increasing by means of fresh loans, due chiefly to bad administration and famine.

The receipts for the year ending 31st March 1906 were estimated at Rs. 5,29,434 ; while the actual receipts, both ordinary and extraordinary, including loans, came to Rs. 3,10,418 only. The extraordinary receipts did not, however, include famine loans, which were kept separately with the Political Officer in charge of Famine Administration, and were not brought

on to the general balances of the State Treasury. The actual expenditure for the year was Rs. 2,94,555 against the Budget Estimate of Rs. 5,13,706, due chiefly to the fact that there was no money in the Treasury, and that the loans applied for, for administration purposes, had not been obtained. Some five months' pay was due to establishments at the close of the year, and several months' back accounts were not settled and paid.

The Financial Member was appointed about the middle of April, and a regular Budget for the next six months was then prepared. A general reduction was carried out in almost all the Departments of the State, and a scheme was prepared for the future, whereby a saving of nearly a lakh of rupees in expenditure and an increased revenue of nearly the same amount was suggested, to enable the State to repay the large debts which told so heavily on the finances of the State. It was further anticipated that the realisation of recoverable outstanding balances would bring in another 45,000 rupees a year into the Treasury for the next five years. It is gratifying to note that the results of the past six months have clearly shown that, ~~that~~ <sup>aim</sup> of the total annual surplus of about Rs. 2,45,000 being responsibly relied on.

October 1906, as and extraordinary receipts for six months ending 31st were actually realised estimated at Rs. 4,08,400, while the actual receipts from the following causes:—

- (1) The total receipts, Rs. 4,01,605, showing an increase of Rs. 93,205. The expenditure estimated at Rs. 4,56,600, including a sum of Rs. 1,65,000
- (2) A considerable sum of Rs. 1,65,000, representing the back pay of establishments for the past five months and the settlement of a number of unadjusted accounts of the previous year.
- (3) The total expenditure amounted to Rs. 4,65,256, showing an increase of Rs. 1,00,000, mainly to the settlement of old accounts. The surplus of Rs. 1,00,000 at the close of the half year ending October 1906 was

The number

and 622 cases satisfactory to observe that all the back pay of establishments of these 500 cases has been disbursed, and the long standing accounts duly adjusted within the half year, and that all monthly bills are now regularly disposed of at the beginning of the month succeeding that to which they relate.

With effect from the 1st of the month the heads of Departments are strictly warned to submit all bills for each month by the 5th of following month on pain of increased expenditure, while the account office has to pass bills and the Treasury to make the payment by the 10th of that month without fail.

The Assets of the State consist of:—

	Total.	Recoverable.
(1) Arrears of Land Revenue	Rs. 3,66,859	1,50,000
(2) Gardens ... ..	1,319	800
(3) Debts due by Relatives, Jagirdars, Zenani Deorhi, etc. ... ..	1,39,827	1,00,000
(4) Taccavi advances ... ..	24,242	24,242
(5) Miscellaneous ... ..	1,819	1,000
Total ... ..	<u>5,34,066</u>	<u>2,76,042</u>

It will be seen that out of the total Assets of Rs. 5,34,066, only Rs. 2,76,042 are considered recoverable.

The debts due by Relatives, Jagirdars, Deorhi Zenani, etc., are of long standing, and no end of efforts in the past proved of any avail towards the recovery of the same. Reasonable six-monthly instalments have now been fixed, and all these debtors have agreed to punctually pay up Rs. 24,600 a year according to the instalments fixed. In case of default, excepting in times of famine or for other natural causes, the defaulting party would at once make over to the State such of their villages as would ensure the regular payment of the instalments until such time as the debts are wholly cleared up. There are, however, two relatives, specially Kunwar Sujan Palji, His Highness' cousin, whose debts amount to Rs. 30,000, and who has no means of paying back the money, in whose case some concession will have to be made.

The instalments for the last six months have duly been paid accordingly.

The liabilities of the State are as follows :—

(1) Debts due to R. B. Seths Mulchand and Nemichand of Ajmer :—				
Principal	...	...	Rs.	3,80,000
Interest...	...	...	"	37,139
				<u>Rs. 4,17,139</u>

The interest Rs. 37,139 has been paid after the close of the period under report.

(2) Debts due to Srij's temple :—				
Principal	...	...	Rs.	10,000
Interest ...	...	...	"	250
				<u>Rs. 10,250</u>

(3) Debts due to the Government of India :—				
Principal	...	...	Rs.	5,62,000
Interest ...	...	...	"	13,957
				<u>Rs. 5,75,957</u>

(4) Tosha-Khana debts with interest...	...	Rs.	35,256
Total ...			<u>10,39,602</u>

It is anticipated that the interest on the liabilities will be paid annually as it falls due, while the principal will be paid back by fixed instalments as below :—

In the year ending 31st October 1907	...	Rs.	1,00,000
and in the following years at the rate of ...	"		1,50,000
until the whole debt is cleared.			

## CHAPTER VI.

### MEDICAL DEPARTMENT, VITAL STATISTICS, &c.

35. There is one hospital at the Saddar and three dispensaries at Machilpur, Mandrail, and Sapotra. There is also one female dispensary in the Karauli town. The number of these institutions remained the same, i.e., five as last year.

277 "in" and <sup>44248</sup>~~4,424~~ "out"-patients were treated in all the institutions during the period under report, against 200 and 51,811 respectively in the preceding year, showing an increase of 77 "in" and a decrease of 7,563 "out"-patients.

83 major and 2,879 minor operations were performed during the period, against 108 and 3,703 respectively in previous year.

The total expenditure incurred on the medical institutions was Rs. 10,944-11-3, against Rs. 10,837-4 in the year before.

The vaccination operations are carried out under the general supervision of the Hospital Assistant, Saddar dispensary, assisted by an Inspector who supervises directly the work of the vaccinators and goes out into the district to inspect the progress of the operations.

1,669 children in all were vaccinated during the period. Of these, 1,584 cases proved successful.

Appendix No. XXIII gives details of the Medical Relief afforded in the State during the period under report.

The total number of births and deaths during the year ending the 31st March 1906 was 1,878 and 1,385 respectively, against 2,435 and 2,319 of the last year. During the half-year ending the 31st October, 1906, the total number of births and deaths was 800 and 1,988 respectively.

Cholera had broken out in epidemic form in the city on the 16th July 1906. There were altogether 484 seizures and 198 deaths.

Appendix No. XXIV shows the details of the Vital Statistics of this State.

## CHAPTER VII.

### EDUCATION.

36. The Maharajah High School at Karauli consists of the following departments and classes, with their respective standard of teaching. Education.

(1) English department—

- (a) Entrance Examination of the Allahabad University; and
- (b) Rajputana Middle Examination of Ajmer.

(2) Sanskrit.

- (a) *Shastri* examination of the Punjab; and
- (b) *Madhyama* of the Benares College.

(3) Persian *Munshi Fazil* of the Punjab.

(4) Final examination of the United Provinces.

(5) Rajput class. Upper Primary English and Vernacular.

(6) *Patwari* class. Local *Patwari* Examination.

There is a girls' school in the Karauli city. It has 30 students on the roll against 10 in the previous year. The Lower Primary Vernacular Hindi examination is the standard of its teaching.

Five village schools located at the principal towns, within the Karauli territory, teach Hindi vernacular up to Upper Primary standard.

There are thus altogether seven schools working in the State.

The total number of pupils on the roll on the 31st October 1906 was 530, against 561 of the last year, with a daily average attendance of 317.68. Famine, cholera and malarial fever are the chief causes of the decrease in the number and attendance of the pupils in the schools.

The village schools are inspected periodically twice a year by the Inspector, who is employed as a teacher in the High School. The Primary schools send up boys for Annual Examination held by the Headmaster. During the period under report three schools only were represented.

The following is the result of public examinations held during the period under report :—

		No. sent up.	No. passed.
1. Entrance Examination	...	1	...
2. English Middle Examination	...	4	...
3. Hindi Middle	...	1	1
4. Urdu Middle	...	...	...
5. Munshi	...	1	...
6. Madhyma	...	2	2
7. Prathama	...	3	3
8. Pragna	...	2	2
9. Patwari class	...	...	...
		<u>14</u>	<u>8</u>

The results of the Sanskrit examinations are very satisfactory, while that of Entrance and English Middle is bad. Taking into consideration the various high standards up to which the High School teaches, the number of teachers specially in the English branch is not only insufficient but is also inefficient, the staff mostly consisting of low-paid teachers possessing very limited knowledge. The pupils too do not seem to pay due attention to their studies in English and Mathematics. The schools require thorough reorganization, and as soon as funds permit, the question will be taken in hand at once.

The accommodation for all classes in the High School is not sufficient. The question of providing a separate building for Rajput classes is also under consideration.

Education is imparted to all and every one of the pupils free of cost. The State further awards scholarships to successful students, and bears all expenses of the students incurred in connection with public examinations, such as fees, journey expenses, &c.

Bhanwar Jasraj Pal, son of Kanwar Sujan Pal, continues to work well at the Mayo College. All expenses connected with his education are borne by the State.

The total expenditure incurred on education during the period under report amounted to Rs. 6,304, as detailed below :—

	Rs.
1. During the year ending 30th April 1906	4,069
2. " " half-year ending 31st October 1906	2,235
Total	<u>6,304</u>

## CHAPTER VIII.

## MISCELLANEOUS.

37. There is a Litho Printing Press in the State Jail. Vernacular printing is done according to the requirements of the several Departments of the State.

Press.

38. The Sheoratri Cattle Fair was held as usual for a fortnight in the month Phagan (March).

Fairs.

This is the only fair held at the capital, and is mostly visited by outside traders and men coming for the purchase and sale of cattle as well as of other articles of merchandise.

Kaila Devi Fair was held in the month of March. Pilgrims from the neighbouring States and from the districts of Agra and Muthra visit the sacred shrine of the Kaila Devi, a place about 14 miles south of the town of Karauli.

BALMOKAND DAS, C.I.E.,

DIWAN BAHADUR,

*Financial Member, State Council, Karauli.*

## APPENDICES.

## APPENDIX I.
